### **DETAILED ACTION**

Claims 1-23 are pending.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 8-9, drawn to a dehydrogenase, classified in class 435, subclass 190.
- II. Claims 5-7 and 10-16, drawn to DNA encoding a dehydrogenase, vector comprising said DNA, transformant comprising said DNA and a method of producing the dehydrogenase, classified in class 435, subclass 190.
- III. Claims 17-23, drawn to a method of producing alcohols, classified in class 435, subclass 155.

The inventions are distinct, each from the other because of the following reasons:

The protein of Invention I is related to the nucleic acids of Invention II by virtue of encoding the same. Although the DNA molecule and protein are related since the DNA encodes the claimed protein, they are distinct inventions. The two are physically and functionally distinct chemical entities. Also, the protein product can be made by another and materially different process, such as by synthetic peptide synthesis or purification from a natural source. Furthermore, the DNA may be used for processes other than the production of the protein, such as nucleic acid hybridization assay.

Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the

Art Unit: 1652

process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the DNA of Invention II can be used for the production of the protein of Invention II or in hybridization assays.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
